

UNO

UNO Fluid Gun & UNO Station

With cycleWASH UNO Station you get a complete cleaning station for manual bicycle washing. It can also be combined with a cycleWASH mini-duo and then used for pre-cleaning & air-drying.

The cycleWASH UNO Fluid Gun is available separately as an accessory for all cycleWASH bicycle washing systems. With it you can pre-clean, rinse and air dry your bike. By using air pressure, the cycleWASH UNO Fluid Gun has a very low water consumption — less than 1 l / min. — and is nevertheless extremely gentle on sensitive parts such as bearings, seals, hubs, chains, lettering, etc.

You need an air compressor to operate the cycleWASH UNO.

Technical specifications

Air requirement

Operating pressure

Noise emission max.
