The cycleWASH Clean & Dry Gun is available separately as an accessory for all cycleWASH bicycle washing systems. With it you can pre-clean, rinse and air dry your bike. By using air pressure, the cycleWASH Clean & Dry Gun has

a very low water consumption – less than 1 l / min. – and is nevertheless extremely gentle on sensitive parts such as bearings, seals, hubs, chains, lettering, etc.

You need an air compressor to operate the cycleWASH Clean & Dry Gun. If required, you can obtain suitable compressors directly from cycleWASH.

Technical specifications
