

mobilePOINT

Transport, Storage & Solar Power

In addition to the stationary cycleWASH POINTS, we offer a flexible and transportable solution with the mobilePOINT concept: Offer semi-automatic bike washing with a cycleWASH mini BASIC, UNO or DUO at events, on bike trails or frequented locations in urban areas.

Combine one of our compact bicycle washing machines with the cycleWASH Solar Trailer and create a completely location-independent bicycle cleaning service. The solar trailer has a battery module as intermediate storage for the energy of the photovoltaic panels. This means that a cycleWASH bicycle washing system can be operated independently of the mains. For the water supply, simply load a few canisters of fresh water into the trailer.

Alternatively, the cycleWASH Solar-Wall is an ideal system for off-grid operation of your bicycle washing system with solar power in stationary scenarios.

Solar Trailer

In the cycleWASH solar trailer you can safely transport and store your bicycle washing system. Simply slide the machine into the trailer at the end of the cleaning day and protect it from vandalism and the weather conditions.

Technical specifications

SMART Lithium-Ion battery pack
configurable up to 4 x 100Ah / 2560 Wh

MPPT solar charger
150 volts / 70 amps

Voc 40V solar panel
flexible or monocrystalline

BMS
Battery Monitor System
