

cycleWASH POINT

Service
Meeting
Parking

With our **cycleWASH POINTs** we would like to establish modern spaces for the needs of all bicycle enthusiasts in urban areas. Mobility hubs in cities are particularly suitable as location.

Thanks to the modular structure, the **cycleWASH POINTs** can be specifically adapted to the needs at the location: In addition to the bicycle wash, in a **Service POINT** repair and maintenance are also available. The **Meeting POINT** combines the cycleWASH bike wash with a café. The **Parking POINT** variant offers secure bicycle parking facilities and is therefore particularly suitable for Park & Ride areas of public transport.

Additional features such as **energy supply via a solar system**, **rainwater harvesting** and **e-bike charging** stations complete the mobility solution.

The cycleWASH POINTs are available in 20 feet and 40 feet container sizes.
